

Questionnaire

Steam Injectors / Mixing Nozzles Type „RKE, RFF, RLF“ for pipeline mounting

1. Conditions at the liquid inlet

To be heated medium
Closed circuit
or single run-through
Fill capacity (in case of circuit) m³
Initial-temperature °C
System-pressure (Liquid) bar(ü)
Density kg/m³
Volume flux i.N.
eg. Pump capacity m³/h

(Pic. Type RFF)

2. Nominal conditions at the Discharge

Final temperature °C
In case of circuit:
Heat-up time min

3. Heating steam

Pressure bar(ü)
Temperature °C

4. Material

Required material (321, 316Ti, etc.)

5. Connections

Kind of connection (Flanges, thread, etc.)
DIN / ANSI
PN / lbs.
Other one

6. Further remarks or data (if necessary)

.....

Questionnaire

Steam Injectors / Mixing Nozzles Type „IFF, ILF, IGE, IFA“ for mounting in vessels

1. Start - Conditions

To be heated medium
 Fill-capacity of the tank m³
 Initial-temperature °C
 System-pressure (Liquid) bar(ü)
 Density kg/m³

(Pic. type IFF)

(Pic. type IFA)

2. Nominal conditions

Final temperature °C
 Heat-up time min

3. Heating steam

Pressure bar(ü)
 Temperature °C

4. Material

Required material (321, 316Ti, etc.)

5. Connections

Kind of connection (Flanges, thread, etc.)
 DIN / ANSI
 PN / lbs.
 Other one

6. Assembly

Existing standpipe (DN, PN)
 Assembly from inside / outside

7. Further remarks or data (if necessary)
